

SVM MAY 27, 2026 LAUNCH OVERVIEW

Apps Ready to Launch and Coming Soon

A quick overview of SVM product areas that are ready for early launch, plus the capabilities planned next.

Ready to Launch

READY MathPath Tutor

Adaptive AI math tutoring for grade-school through high-school students, from diagnostic assessment to daily practice and guided AI tutoring.

- Parent signup and login
- Student onboarding
- Adaptive diagnostic assessment
- Skill profile generation
- Personalized daily lessons
- AI tutor chat
- Parent dashboard and student management
- Lesson review, history, achievements, and gamification

READY Parent Progress Reports

Clear parent-facing visibility into progress, mastery, confidence, and recent learning activity.

- Parent dashboard
- Weekly progress report generation
- Student progress summaries
- Recent activity review
- Student-level progress APIs

READY Admin Operations Console

Internal SVM operations tools for managing students, reviewing analytics, and maintaining the learning skill map.

- Admin dashboard
- Student oversight
- Analytics views
- Skill map management
- Skill create, update, and delete routes

READY Billing and Subscription Flow

Early paid conversion path for families moving from demo or trial usage into a subscription.

- Plan selection page
- Stripe checkout
- Billing success page
- Customer billing portal
- Stripe webhook handling

READY Deployment Foundation

Core deployment pieces needed to stage and operate the product.

- Docker support
- AWS deployment documentation
- ECS task definition
- Health check route
- Environment-based production configuration

Coming Soon

SOON Adaptive Learning OS

Expansion from a math-only tutor into a broader adaptive learning platform.

- Multi-domain learning support
- Learner profiles beyond math
- Personalized intervention plans
- Social-emotional learning signals
- Flexible learning modules

SOON Expanded AI Learning Engine

More responsive lessons, assessments, tutoring, and remediation.

- Richer mistake analysis
- Stronger prerequisite detection
- Adaptive remediation paths
- Confidence recovery support
- More nuanced learner memory

SOON Notifications and Engagement

Lightweight nudges that help families stay consistent.

- Parent email updates
- Weekly report delivery
- Lesson reminders
- Progress milestone alerts
- Missed-practice nudges

SOON Student Independence Mode

A safer, more independent student experience built on student login.

- Student-first login flow
- Age-appropriate navigation
- Student-owned progress views
- Independent lesson continuation
- Parent-controlled permissions

SOON Richer Parent Insights

More actionable parent reports and summaries.

- Mastery and confidence trends
- Plain-language skill gap explanations
- Recommended parent actions
- Monthly learning summaries
- Exportable reports

SOON Classroom and Group Support

Growth path for groups, pods, tutoring centers, and classrooms.

- Cohort management
- Group progress dashboards
- Educator and tutor accounts
- Assignment-style learning plans
- Cohort-level analytics

Suggested Launch Path

1. Internal SVM staging review
2. Private pilot with selected families
3. Paid beta with billing enabled
4. Broader public launch after QA, reporting, and operational feedback are stable

Launch Readiness Notes

Before public launch, SVM should confirm pricing, production environment variables, Stripe webhook setup, email configuration, privacy language, database migration readiness, and end-to-end QA across sign-up, onboarding, diagnostic, learning, tutor, dashboard, billing, and admin flows.
